

### Short Pitch:

My portfolio site is going to highlight my photography. I plan on adding a variety of my different photos from sports, black and white, to street photography. Included will be a photo grid and possibly an about me page.

### Long Pitch:

I have been a photographer for a few years now and I would like to actually compile my work into a portfolio site. I worked for the State News so I have experience shooting sports, political and community events, concerts, and many more events. I want to add a media grid of a wide selection of my material, possibly thumbnails that will enlarge after being clicked. Included will be an about me section. In this section I could elaborate about my schooling, my work experience, etc.

### Personas:

Student Photographers

Journalists

Art Enthusiasts
